EDUCATION BACKGROUND

New York University *New York, United States*
M.S. in Project Management (GPA 4.0/4.0) *2025 – Present*
Beijing Normal-Hong Kong Baptist University *Guangdong, CHINA*
B.A. in Public Relations & Advertising | Second-Class Scholarship *Sep.2021-Jun.2025*
University of Hong Kong Media Summer School (**Ranked #1 in class**) | University of Edinburgh Business Communication Summer School

INTERNSHIP EXPERIENCE

Monolith Capital *Beijing, CHINA*
Investment Operations Intern *Oct.2025 – Present*

- Built a structured tracking system for AI startups covering company profile, financing stage, product, team, and technical approach, improving the quality and speed of investment memo preparation.
- Managed a high-frequency bilingual research pipeline across foundation models, AI agents, and AI-native tools, producing market maps, competitive analysis, positioning notes, and trend briefs.
- Created SOPs for data collection, source validation, field standards, and update cadence, reducing duplicated research work and handoff friction across projects.

Crossing (Tech Media) *Shanghai, CHINA*
Content Editorial Intern *Apr.2025-Sep.2025*

- Tracked global AI startup activity across models, agents, and AI-native tools; produced newsletters, in-depth WeChat articles, podcast companion pieces, and company/product research.
- Redesigned editorial templates and collaboration workflows for topic selection, fact-checking, formatting, and publishing, increasing team production efficiency by approximately **40%** while reducing rework.

36Kr – Waves (Investment Reporting) *Beijing, CHINA*
Media Operation Intern *Jun.2024-Oct.2024*

- Scaled a Xiaohongshu investment-media channel from early operations to **10,000+ followers; top post reached 400,000+ views and 3,000+ engagements**.
- Developed content around AI startups, VC deal flow, and founder stories, turning audience comments and performance data into repeatable content themes for a tech and finance community.
- Built content SOPs and tracking sheets for planning, publishing, retrospectives, and account analytics, shortening production cycles and improving operating consistency.

SELECTED PROJECTS

Asana Challenge - Adaptive Sync *Beijing, CHINA*
Project Assistant *Feb. 2026-May. 2026*

- Defined the product problem for Slack, Jira, and Asana users by mapping fragmented updates, status drift, duplicated communication, and delayed risk detection across PM, team lead, and cross-functional workflows.
- Designed an AI collaboration layer that detects tasks, owners, due dates, blockers, comments, and status changes from Slack, then converts them into Asana project updates with user review and permission controls.
- Set the product principle of "no new tools, no new habits" and translated it into onboarding, role-based access, audit logs, human-in-the-loop review, and fallback paths to balance automation with user trust.

Wavo! AI Open Course Program *Beijing, CHINA*
Deputy Project Lead *Oct. 2024-Dec. 2024*

- Co-led a public AI education initiative helping non-technical users build AI products — from prompt engineering to multi-agent workflows — partnering with Volcano Engine, ZhenFund, Zhipu AI, and Devv.ai.
- Designed full curriculum, coordinated 4 institutional partners, built live-stream classrooms, and drove community growth through end-to-end promotion and operations.

TECHNICAL SKILLS

AI Products & Agents: ChatGPT, Claude, Gemini, NotebookLM, Cursor, Perplexity, Manus, OpenClaw, DeepSeek, etc.
Domain Knowledge: AI investment landscape, VC ecosystem analysis, startup deal flow, content strategy & editorial operations, event planning. User workflow mapping, product discovery, agent feature scoping, prompt design, competitive analysis, AI workflow design, market research, content strategy, feedback loops, SOP design.
